Specifications

Model name	MC-WU8701W MC-WU8701B	MC-WU8601W	MC-WX8751W MC-WX8751B	MC-WX8651W	MC-X8801W
Display system	3LCD				
Display device — Size of effective display area	0.76" × 3 aspect ratio 16:10				0.79" × 3 aspect ratio 4:3
Display device — Number of pixels	2,304,000 pixels (1920 horizontal × 1200 vertical)		1,024,000 pixels (1280 horizontal × 800 vertical)		786,432 pixels (1024 horizontal × 768 vertical)
Lens	Optional (No lens include in the projector)				
Lens — Zoom	Motorized (except for the option lens FL-710 / FL-701)				
Lens — Focus	Motorized				
Lens — Lens shift	Motorized (V,H) (except for the option lens FL-710 / FL-701)				
Light source	430 W lamp	370 W lamp	430 W lamp	370 W lamp	430 W lamp
Screen size	30 ~ 600 inch (100 ~ 350 inch for the ultra short throw fixed lens FL-701, 60~600 inch for the ultra short throw lens USL-701)				
Light output (Brightness)*1	7,000 lm	6,000 lm	7,500 lm	6,500 lm	8,000 lm
Contrast ratio (full white / full black)*2	10,000 : 1 (Presentation mode)				
Speaker	8 W × 2 (mono)				
Displayable scanning frequency — Horizontal	31.5 ~ 106 kHz				
Displayable scanning frequency — Vertical	56 ~ 120 Hz				
Display Resolution — Computer	WUXGA*3 (max.) *Native resolution is WUXGA.		Full HD (max.) *Native resolution is WXGA.		Full HD (max.) *Native resolution is XGA.

Environment

▶ **Compliance with EU Directive RoHS*1**
▶ **Reduction of resin usage in production** Use of hot runners in molds for making upper housing in order to reduce mill ends.

*1 RoHS is the acronym of "Directive 2011/65/EU of the European Parliament and of the Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment".

—Design and specifications are subject to change without notice.

• The projected images and comparison photos in this catalog are simulations. • LCD panels, polarizers and other optical components and cooling fans may need replacement after prolonged usage. For more details, please consult a sales representative. • Do not use in places where there is a lot of water, dampness, steam, dust, soot or tobacco smoke. This may result in fire or malfunction. • Optical components (lamp, LCD panel, polarizing plate, PBS [polarizer beam splitter]) have limited service lives. They must be repaired or replaced if they are used for a long period of time. • These projectors use a mercury lamp with high internal pressure. Because of its properties, this lamp may burst with a loud noise or burn out if struck or after it has been used for a period of time. The time until it bursts or burns out varies greatly according to differences between lamps and usage conditions. Turning the lamp's power on and off frequently shortens its service life. • Optical components other than the lamp: If the projector is used for six hours or more per day, they may need to be replaced in less than a year. • LCD panel: If the projector is used continuously for six hours or more, its replacement cycle may be shortened. • Do not turn projector on again for ten minutes after shutdown. Neglect can shorten the lifetime or the lamp. During use and immediately after use, do not touch anywhere near the lamp and the vents as these parts are extremely hot. • Each product may have differences of color, brightness and focus due to manufacture variation. • Blu-ray Disc™ and Blu-ray™ are trademarks of Blu-ray Disc Association. • Crestron Connected and the Crestron Connected Logo are registered trademarks of Crestron Electronics. • HDMI, the HDMI Logo, and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing Administrator, Inc. in the United States and other countries. • DICOM is the registered trademark of the National Electrical Manufacturers Association for its standards publications relating to digital communications of medical information. • HDBaseT™ and the HDBaseT Alliance logo are trademarks of the HDBaseT Alliance. • Extron® is registered trademark of RGB Systems, Incorporated. • All other trademarks are the properties of their respective owners.

High Image Quality and Visibility

ACCENTUALIZER and HDCR

ACCENTUALIZER makes pictures look more real by enhancing shade, sharpness, and gloss, to make pictures clearer. The HDCR function corrects blurred images caused by room lighting or outside light sources and creates an effect similar to increasing contrast resulting in clear images even in bright rooms.
* Comparison photos are simulations.

Bright room

HDCR OFF ➤ HDCR ON
IMAGE OPTIMIZER

Equipped with IMAGE OPTIMIZER that maintains visibility of an image through automatic image correction in accordance with lamp condition.
* This function may not work properly when HDCR and/or ACCENTUALIZER is ON.
* Comparison photos are simulations.

After long-hour use

IMAGE OPTIMIZER OFF — The entire image becomes dark. ➤ IMAGE OPTIMIZER ON — Dark parts of the image becomes clear.
COLOR MANAGEMENT

This feature allows you to change the HUE, SATURATION, and LUMINANCE for each of 6 colors (red, green, blue, cyan, magenta, and yellow) without influencing each other. With this technology, for example, you can change only bluish colors, such as the sky, while maintaining the other colors by adjusting the HUE of the blue.
* Comparison photos are simulations.

Advanced Installability and System Features for Various Uses

Warping

This function is possible from your computer by using the specialized application. Projection is possible on spherical surfaces and surfaces with corners, as well as conventional flat screens.

Spherical object | Corner wall | Curved screen | Curved screen

* The specialized application for geometry correction is required.

Various Installation

Projectors can be installed facing vertical 360 degrees directions*1. In addition, by rotating the installation position of the projector 90 degrees*2, you can project images that are vertically long. These features make it possible to provide various displays and image representations.

360°projection*1 — 360° | Portrait projection*2 — 90° 90°
*1 When the ultra long throw lens UL-705 is attached, the projector cannot be installed facing its projection lens upward or downward.
*2 Limited to the position where the lamp door side faces upward. When the projector is used in a portrait installation, the service life of a lamp becomes shorter.

Edge Blending

The projectors are equipped with the Edge Blending function that achieves further seamless projection of one image using multiple projectors, and allow to project on a huge curved screen by using the geometry correction simultaneously.

* Additional equipment may be required for this feature.
* This figure is not drawn to scale.

Motorized Lens Shift

The motorized lens shift lets you choose more convenient installation locations, even for large spaces.

* The figure below shows the lens shift range for MC-WU8701W / MC-WU8701B / MC-WU8601W / MC-WX8751W / MC-WX8751B / MC-WX8651W with the optional middle throw lens ML-713 at the ceiling mounting position.

Digital Connectivity

Equipped with 2 HDMI® input terminals for the current widely-used interface. In addition, these models have more rich digital connectivity, DisplayPort, HDBaseT™, and SDI*3 input terminals.

*3 SDI terminal is located on the MC-WU8701W/B only.

High Reliability and Stability

Hybrid Filter

The projectors use a three-layer filter with two layers of unwoven cloth and a static electrode filter. The filter can last up to 20,000 hours*4 without cleaning, reducing maintenance time.

*4 This is an estimate of the acceleration test performed under the condition of 50mg/m³ suspension dust concentration using JIS (Japanese Industrial Standards) standard powder. Cleaning intervals vary depending on the use environment.

Easy Maintenance

The lamp door and the filter cover are located on both sides, facilitating maintenance and replacement when the projector is installed on the ceiling. The serial number and MAC address are also labeled on the side chassis for easy readability.

Status Monitor

The status monitor is a sub-LCD located on the rear panel of the projector. It displays the present condition of the projector, including errors, setup information, and error history.

Inorganic LCD panels

Maxell 3LCD projectors incorporate three LCD panels with inorganic alignment layers that are light resistant, increasing brightness and contrast ratio. They provide smooth images and high reliability.
